1880 *Stationer* XXXV 3 We graphed by the dozen 1894 *Western Mail* 2 Oct The Matabeleland News is 'graphed' in manuscript.

-graph (graf), repr. F. *-graphe*, L. *-graphus*, Gr. *-γραφος* The Greek termination was used to form adjectives, sometimes in the passive sense of 'written', e.g. *αὐτόγραφος* written with one's own hand, *χειρόγραφος* written with the hand, sometimes in the active sense, 'that writes, delineates, or describes': chiefly used *absol.* as sbs, 'one who writes, delineates', etc. Examples: e.g *ζωγράφος* a painter from life, *βιβλιογράφος* a writer of books, *γεωγράφος* a delineator of the earth, a geographer Many of the passive formations in *-γραφος* have been anglicized, being for the most part used both as adjs and sbs., as in *autograph, chirograph, holograph.* These words have been imitated in a few modern sbs. formed on Gr. types, as *lithograph, photograph*, and these in turn have been imitated in hybrid formations, such as *pictograph*, jocular nonce-words, like *hurrygraph* for 'a hurried sketch', are occasionally met with. The Gr active formations in *-γράφος*, where they have been anglicized, take in mod Eng the ending -grapher, which is used also for new formations denoting persons (exceptions, such as *calligraph*, are rare) The great bulk of the words in *-graph* is composed of technical terms of very recent invention, mostly formed on Gr elements, and expressing the general sense of 'that which writes, portrays, or records', as *actinograph, heliograph, hygrograph, ideograph, phonograph, seismograph, telegraph*, etc.

-grapher (gráfəı), an ending of many Eng. words of Greek derivation First found in the earlier half of the 16th c The analogy of *astronum er* (really f. *astronomy*, but having the appearance of being f. L. *astronom-us* + -er[1]) naturally suggested the use of the suffix *-er* as a means of anglicizing L. words in *-γράφος* without altering their rhythm, as in *cosmographer* (recorded 1527) In the 16th c. there also occur a few derivatives in *-er* from nouns in *-graphy*, as *geographer* (1542), *chronographer* (1548), but these were soon superseded by the forms in *-grapher*. (In Chirographer, q.v., the ending has a different source.) From the latter part of the 16th c. the formation with *-grapher* has been the normal mode both of anglicizing a real or assumed Gr. word in *-γράφος* (see -graph) denoting a personal agent, and of providing a personal designation correlative to sb. in -graphy denoting an art or science. It would often be impossible to determine in which of these two ways an individual word actually originated; but the question is unimportant, because Gr. words in *-γράφος* were themselves influenced in sense by their derivatives in *-γραφία*, so that, e g. *γεωγράφος* meant not so much 'one who describes the earth' as 'one versed in *γεωγραφία*'.

The suffix *-ist* has sometimes been used instead of *-er* in anglicizing Gr words in *-γράφος* or forming derivatives from sbs in *-graphy*, cf *biographist* for the more usual *biographer*, *telegraphist* is more common than *telegrapher*

-graphy (gräfi), *-s* = F., G. *-graphie*, Sp. *-grafia*, It. *-grafia*, L. *-graphia*, repr. Gr. *-γραφία* in sbs. adapted from Gr. or formed on Gr. types. The Gr. sbs. in *-γραφία* are abstract nouns of action or function derived from the sbs (or adjs) in *-γράφος* (see -GRAPH, -GRAPHER). Many of these have been adapted in Eng. (usually through the medium of other langs.), and many other compounds of Gr. elements on the analogy of them have been formed in Eng., or adapted from Fr. or mod.Lat. Some of the words with this ending denote processes or styles of writing, drawing, or graphic representation, as *brachygraphy*, *calligraphy*, *stenography*, *cryptography*, *lithography*, *photography*. More commonly they are names of descriptive sciences, as *geography*, *bibliography* (cf the Gr. *βιβλιογραφία*, which means the writing of books), *astrography*, *cosmelography*, *petrography*, *selenography*, etc. Hybrid formations with this ending are rare, *stratigraphy* being almost the only example that has obtained general currency. All sbs. in *-graphy* have actual or potential correlative agent-nouns in *-grapher* and adjs. in *-graphic*, *-graphical*.

c. **Specific gravity.** The degree of relative heaviness characteristic of any kind or portion of matter; commonly expressed by the ratio of the weight of a given volume to that of an equal volume of some substance taken as a standard (viz usually water for liquids and solids, and air for gases) Abbreviated *sp. gr.*

Since the weights of bodies are proportional to their masses, their specific gravities are in the same ratio as their densities; and in some scientific books the term *density* has displaced *specific gravity*.

5. The attractive force by which all bodies tend to move towards the centre of the earth, the degree of intensity with which a body in any given position is affected by this force, measured by the amount of acceleration produced. Also often in wider sense, the degree of intensity with which one body is affected by the attraction of gravitation exercised by another body.

Some writers who restrict the word to terrestrial attraction apply it to the resultant of the earth's attraction of gravitation and the centrifugal force due to the earth's rotation, while others apply it to the gravitational component only

The receipts quoted under sense 1 below are substantially identical with receipts in 15th century books, in which the word is *grand*. For the OF word the reading *grand* seems certain (though in printed texts *grant* usually appears), it is prob. corr. with OF. (Godef.), and with Grenade², Grenading; cf also *Jant grenon* = 'gravy bastard'. But in the Eng MSS the word has nearly always either a *v* or a letter which looks more like *u* than *n* (the *u* and *n* are indistinct in the 'table' to *Liber Cocorum*, which has three *grane*, while the text has *gruue*). As the ME. word was therefore identical in form with the mod. word, the difficulty in spite of the difference in sense, to regard them as unconnected. In the present state of the evidence, the most probable conclusion is that the OF *grand* was early mistaken for *grand*, *grant*, and that form became current as a term of English cookery]

(See also GREATER, GREATEST.) [Com. WGer. OE. *grēat* = OFris. *grēt*, OS. *grēt* (MDu., Du. *groot*), OHG., MHG. *grōz* (G. *groß*) —OTeut **grauto-* :—pre-Teut **ghrowdh-*. (Wanting in Gothic and Scandinavian.)

On the assumption that the primitive sense is 'coarse' (sense 1 below), some scholars regard the word as cognate with ON. *grautr* porridge, OE *grīt* fine meal, *grēot* particle, *grȳtte* coarse meal, *grēot* sand, gravel, ON. *grjōt* stones. But the connection is not without difficulty, as the cognates of these words outside Teut. point to a root meaning 'to pound', a sense from which that of the adj. is not easily derived. It has been suggested (Stokes in Fick *Ilg Wb* ii 219) that a cognate of the Teut adj. may exist in the OIrish *grenaid* (? —pre-Celtic **ghrowdes*) cheek (? lit. 'thick or fleshy part' of the face: cf. sense 9 below, and the contrasted notion in OE. *hnutwang* lit 'thin cheek', the temples); the prevailing senses in OE are 'coarse, thick, stout, big', but the word also appears as an intensive synonym of *micel* MICKLE, which in the later language it superseded. In OHG *grōz* had the senses of 'big, awkwardly large' and of 'pregnant', but was also used as a synonym of *mehtig* (though not with reference to length); in OS *grōt* is recorded only in the sense of 'great', in which it is less frequent (and possibly more emphatic) than *mikil*. The development by which *great* has superseded *mickle* (not only in Eng. but also in Du., Ger., and Fris.) may be illustrated by reference to the mod. colloquial substitution of *big* for *great*, and to the supersession of L. *magnus* in Rom. by *grandis* big, full grown (see GRAND *a.*)

In sense 1, as in *break*, the influence of the preceding *r* has caused ME *ē* to be sometimes lowered by (*e*) instead of the usual (*i*), cf. *bread* with *ē* instead of *a*. The pronunciation (grīt) was, however, very common, and approved by the majority of orthoepists, throughout the 18th c., it seems to have been merely an artificial fashion. Many modern dialects have (gret), and others have metathetic forms such as (grīt), a common Sc form, exp. in senses 1 and 2, as *gryte* (gryt).]

II. Having a high position in a scale of measurement or quantitative estimation Opposed to *small*, *little*.

With words like *as*, *so*, *how*, the adj. like some other adjs. and advs. of cognate meaning (cf FAR *adv.* 6), admits of being used in a weakened sense, expressing size or quantity in the abstract, i.e. 'as great as' may mean merely 'equal in size or amount to', without any implication that the things compared are 'great'. See also GREATER.

6. Of material objects, with reference to size.

In unemphatic use the word in this application is now superseded by *large* or (colloquially) *big*. To use *great* with reference to size now implies either some kind of feeling on the speaker's part, or a mixture of some other sense in the adj. Thus 'I found a *large* table in my room' would simply state a fact, but if *great* were used the sentence would indicate annoyance, amusement, or surprise. Often preceding a partly synonymous adj., as in *great big*, *great thick*, etc. The adj. has never had, like the F. *grand* and the G. *groß*, the sense of 'tall', if used with reference to stature it expresses some feeling such as surprise, contempt, or admiration, as in 'that great boy', 'a great tall man'.

[In branch I The OE. *Crécas* pl., corresponds to OHG. *Chrtch, Chrich* (MHG. *Kriech*), Goth. *Krēhs*:—*Krēko s*, an early Teut. adoption of L. *Græcus*, pl. *Græci* (see below), the name applied by the Romans to the people called by themselves Ἕλληνες. The substitution of *k* for *g* is commonly accounted for by the supposition that the Teut. initial *g*, when the word was adopted, still retained its original pronunciation (γ), so that *k* would be the Teut. sound nearest to the Latin *g*. In all the Teut. langs. the word was ultimately refashioned after Latin, with change of *k* into *g*; hence OE *Grécas* pl beside *Crécas*, MDu. *Grieke* (Du. *Griek*), mod Ger. *Grieche*, ON. *Grikkir* pl. In branch II the sb. is an absolute use of Greek *a.*

The L. *Græci* is ad Gr Γραικοί, said by Aristotle (*Meteor.* I. xiv) to have been the prehistoric name of the Hellenes in their original seats in Epirus. The word is app an adjectival derivative of *Graius*, which is used in Latin as a poetical synonym of *Græcus*. Recent scholars think the name may have been brought to Italy by colonists from Eubœa, where there is some evidence of its having existed see Busolt *Gr Gesch* I 2 198]

The primary sense is uncertain: the senses of early occurrence in continental Teut are 'to approach', 'to call upon', 'to provoke or compel to action' (cf. ON. *grāta* vb. 'irritate, annoy'; 'to address, salute' In mod Ger and Du as in Eng the sense 'salute' has become the prominent one, such other senses as survive being now superseded as transferred from this. (The sb., which may be only a back-formation, expresses the action of the vb in all senses.) The ultimate etymology is equally uncertain: with the radical meaning, many scholars refer the word to OAryan **chrēd-* **ghrēd-* to resound (see GREFFI r. 9), on which supposition the primary sense should be 'to call on', another view is that the Teut root **grōt-* is an extension of the root which appears in Gr. as χρά with the sense 'to approach closely, touch', etc.]

Grey, gray (gr$\bar{e}$), *a.*, and *sb.* Forms *α* 1 gréx, 3-4 gral, 4-6 graye, (6 grase, *Sc.* gra), 4- gray. *β* 1 gréy, gréiy, gréi, 3 grei, 3, 4 greye, 4 greyȝ0, 4 grey [OE. *grǽg* = OFris. *grē*. MDu *graw*, *gra* (Du *grauw*), OHG *grâo*, pl *grâwe* (MHG *grâo*, mod G *grau*), ON. *grár* (Sw *grå*, Da *graa*), repr two OTeut. types **grēwo-* and **grēwo-* ~ pre-Teut **ghreiHo-* (or **ghrēgh-wo-*, the suffix *-wo-* being frequent in colour adjs), with variable accent. Outside Teut no affinities have been found, the word has no connexion with OHG *grîs* (Ger *greis*), Irish *griss*, or Gr. *γρῖς*.

Each of the current spellings has some analogical support. The only mod Eng words of type *grey* with ending in *-ȝ* are *key* (which is irrelevant on account of its pronunciation), *obey*, and *clay*. If we further take into consideration the words repr OE. words in *-ræg*, viz *blay* or *bley*, *hey*, *wey*, we have three (or four) instances of *ey* and only two (or one) of *ay*. On the other hand, this advantage in favour of *grey* is counterbalanced by the facts that *clay* is the only word of the five, which is in very general use, and that *grey* is phonetically ambiguous, while *gray* is not. With regard to the question of usage, an inquiry by Dr Murray in Nov 1893 elicited a large number of replies, from which it appeared that in Great Britain the form *grey* is the more frequent in use, notwithstanding the authority of Johnson and later Eng lexicographers, who have all given the preference to *gray*. In answer to questions as to their practice, the printers of *The Times* stated that they always used the form *grey*, Messrs Spottiswoode and Messrs. Clowes always used *grey*, other eminent printing firms had no fixed rule. Many correspondents said that they used the two forms with a difference of meaning or application the distinction most generally recognized being that *grey* denotes a more delicate or a lighter tint than *gray*. Others considered the difference to be that *gray* is a 'warmer' colour, or that it has a mixture of red or brown (cf also the quot. under *c* below). There seems to be nearly absolute unanimity as to the spelling of 'The Scots *Greys*', 'a pair of *greys*'. As the word is both etymologically and phonetically one, it is undesirable to treat its graphic forms as differing in signification.]

4. A grasshopper or cricket. *dial.*

The genuineness of this sense is doubtful, as the dialect glossaries containing it usually quote as their sole example the phrase 'merry as a grig' (see 5).

5 *A merry* (or † *mad*) *grig* (rarely without adj.) an extravagantly lively person, one who is full of frolic and jest Also in phrase *as merry* (or *lively*) *as a grig.*

[Commonly associated with sense 4, but it is possible that sense 4 is itself merely an erroneous inference from the equivalence of the above phrases with 'a merry crick'; 'merry as a cricket'; the allusion in 'a merry grig' may originally have been to sense 3 or even to sense 2. The relation of *merry grig* to the earlier recorded synonym *merry Greek* is obscure; no doubt one of them must have been a perversion of the other, but the difference of recorded date is too slight to afford ground for saying that *merry Greek* is the original form. The probability seems indeed rather on the other side, as it is not easy to explain why *Greek* should be used in this sense, for which there is no precedent in Fr. Cf. also Gig.]

Groap(e, obs form of Grope.

Groat (grōut, grǫt). Forms: 4–6 **groot(e,** **grote,** 5–6 **grott,** 6 **grot, groate, groatte,** *Sc.* and *north.* **groit, groyt,** 6– **groat.** [a. MDu. *groot*, properly an elliptical use of the adj etymologically = *great* (in the sense 'thick'); cf. MHG *grôz pfenninge* 'thick pennies', Groschen. The equivalent Du. *groote*, OF *grot* (see Gross *sb.*) occur earlier than the Tent forms.

The pronunciation (grǫt), for which compare (brǫd) *bread*, is recognized by many Dicts, but is now old fashioned]

1. *Hist* A denomination of coin (in med. Latin *grossus*, *i. groti*, *groso*, MDu. *groot*) which was recognized from the 13th c. in various countries of Europe Its standard seems to have been in the 14th c. theoretically one-eighth of an ounce of silver, but its actual intrinsic value varied greatly in different countries and at different periods (The adoption of the Du. or Flemish form of the word into English shows that the 'groat' of the Low Countries had circulated here before a coin of that denomination was issued by the English sovereigns.) † *A shilling, pound of groats* = a shilling, money of account, bearing the same proportion to the ordinary 'shilling' or 'pound' as the groat or 'thick penny' did to the ordinary penny.

Artes* Kiijb, A flemmish grote is a litell above 3 farthynges englishe

The English groat coined in 1351–2 was made equal to four pence. This ratio between the groat and the penny continued to be maintained; but owing to the progressive debasement of both coins, the 'old groats' which remained in circulation were valued at a higher rate (see quots. 1465, *c* 1483, also 1552 in b). The groat ceased to be issued for circulation in 1662, and was not afterwards coined under that name. The 'fourpence' (popularly 'fourpenny bit,' 'fourpenny piece'), which was issued from 1836 to 1856 (and since 1888 reissued for colonial circulation) was occasionally called a 'groat,' but the name was neither officially recognized nor commonly used. The Scottish fourpenny piece, first struck in 1358, is called a 'groat' (AF. *grote*) in an English Act of 1390, and this name was used in Scotland itself in the 15th c. Its value was already only 3*d.* English in 1373, and 2*d.* in 1390; later it fell much lower. In Ireland the groat was first struck in 1460. *Harp groat* (see Harry 9) *York groat* (see quot. 1837).

The word first occurs in an interpolation written *c* 1200 on the margin of an 11th c. grutan, but this admits of no known etymology, and is irreconcilable with the phonetic history of the word

see GROTTO and -ESQUE. (Cf Sp., Pg. *grutesco*, an alteration of the It. word after Sp Pg *gruta* = It. *grotta*.) It is remarkable that Florio in both his Dicts. (1598 and 1611) has *crotesca* as an It word, explained as 'antique, fretted, or carued worke'; this, if genuine, would seem to be a re-adoption from Fr. Before the end of the 16th c. the Fr word was occasionally spelt *grotesque*, after the original It; this form was adopted into Eng. about 1640, and has been the prevailing form ever since. But early in the 17th c. writers acquainted with the matter introduced the mas. form of the adj., *crotesco*, which occurs as late as 1646, the more usual It. form *grotesco* appears as Eng first in the 1632 edition of Florio's transl. of Montaigne, and did not become obsolete until the 18th c

The etymological sense of *grottesca* would be 'painting appropriate to grottos'. The special sense is commonly explained by the statement that *grotte*, 'grottoes', was the popular name in Rome for the chambers of ancient buildings which had been revealed by excavations, and which contained those mural paintings that were the typical examples of 'grotesque'. (See *Voc. della Crusca*, s.v. *Grotta*, § iv.) Although this seems to be only a late conjecture, without any actual evidence, it appears to be intrinsically plausible.]

Unless the word be corruptly adopted from some foreign language, the second element must be connected with *swelgan* to swallow, absorb. The earliest recorded form *grundeswelge* has the appearance of being *f. grund* pus (see Ground), the resulting sense 'pus-absorbent' is conceivable, as the chopped leaves of the plant are still (in country places) used in poultices for reducing abscesses. If this be the true etymology, the form *grundeswylge*, whence the most word is descended, must be due to popular etymology, the sord being associated with *grund* Ground *sb*, as if meaning 'ground-swallower', with reference to the rapid spread of the weed. There is, however, an independent parallel to the form of the first element (*grundæ* instead of the normal *grund*), and it cannot be positively affirmed that the form without the *s* is not a mistake, as the only passage in which it occurs are too closely related to be considered independent witnesses.]

† Grundy[1], *Obs. rare*—[1] [? a. Du. *grundje, grontje*, grounding.] A designation applied to a short person.

1570 *Foxe A. & M* (ed 2) II 2307/2 Of some he [John Vander Warfe, of Andwerpe] was called 'shildpad' for that he beyng a short grundy and of little stature, did ryde commonly with a great broad hat.

Grundy[2] (*grʉ*ndi) [? Echoic. see quot. 1840.] Granulated pig-iron.

1840 D. Mushet *Papers Iron & Steel* 12 Fifty years ago this process of granulation was carried on at the Cyfarthfa iron works to some extent. The iron so obtained was called grundy, from the noise produced by the revolution of a large horizontal stone, placed in the water-pit, on which the iron fell in its descent. 1881 in Raymond *Mining Gloss.*

Grundy[3] (*grʉ* ndl). The surname of an imaginary personage (*Mrs. Grundy*) who is proverbially referred to as a personification of the tyranny of social opinion in matters of conventional propriety.

In Morton's play *Speed the Plough* (1798), Dame Ashfield is represented as constantly fearing to give offence for the sneers of her neighbour, Mrs. Grundy. Her frequent question 'What will Mrs. Grundy say?' became proverbial (prob. with especial reference to the passage quoted below) as expressing the attitude of those who regard the disapproval of society as the worst of evils

1798 T. Morton *Speed the Plough* II. ii. (1801) 29 *Dame Ashfield.* If shame should come to the poor child [her daughter]—I say, Tummas, what would Mrs Grundy say then? *Farmer Ashfield* Dom Mrs Grundy, what wou'd my poor wold heart say? 1811 *Examiner* 15 Mar. 170/2 What will Mrs. Grundy say? a 1845 Hood *Open Question* i. [ME *gessen*, cognate with the synonymous MLG., MDu. and mod.Du., Fris. *gessen* (MDu also *gessen*, NFris. *gessen*, *gedsien*), MSw. *gissa*, *gitsa*, Sw. *gissa*, MDa. *gidse*, *gitse*, *getze*, Da. *gisse*, mod Icel. has a derivative form *giska*.

The connexion between the various forms is obscure. According to Tamm *Vemhet Etym Ordb* the Scandinavian forms are adopted from LG *gissen*, a phonetic alteration of *gessen* (cf LG *kissen*, var of *kessen*, a. HG *ketzen* to hunt). It seems, however, more probable that the Sw and Da. forms are native, as the Eng word can hardly be referred to any other than a Scandinavian source The word cannot well descend from an OE. form = ?*Ogessan*, as the initial would then have been *y* (ME *ȝ*). The only remaining possibility would be that it was adopted from continental LG., but there is nothing in the nature of the word to account for its having come from that source in or before the early 14th c. The forms may represent one, or probably more than one, of the OLeut types **getisôjan*, **getisôjan*, **gesisjan*, in any case the word is a derivative of the root of Got *v*., cf ON *geta v*., to get, guess, *geta* sb. fem a guess.

In the late *c.* the word was the usual rendering of I *æstimare*, the influence of which probably affected some of the early senses.]

(2) OE had also *gegild* str. neut, where the prefix *ge-* (see Y- *prefix*) expresses the notion of combined or collective action. This has not been found later than OE, but as the prefix *ge-* regularly disappeared in substantives (cf *yeve*) its representative in the 14th c. would coincide with that of the simple *gyld*. (3) The pronunciation with (g) must be due to adoption of, or influence from, the ON. *gilda* str. neut guild, guild-feast, banquet, also payment, value (Sw *gille*, Da *gilde* guild).—OTeut. **geldjō*

In continental Teut the sense of 'guild' was expressed by a fourth formation from the same root, repr OTeut type **guldjōn* wk fem, and occurring as MLG, MDu *gilde* fem and neut. (Du. *gild*), whence mod G *gilde*, in Carolingian Latin the word appears as *geldonia, gildonia*, explained by *confraternitas*, the later med Lat. form is *gilda*, OF had *gilde, ghilde, ghelde, yode*, etc, in the senses 'guild, band of conspirators']

The root **geld* in these derivatives is prob to be taken in the sense 'to pay, contribute', so that the sb would primarily mean an association of persons contributing money for some common object. Also, however, the root also means 'to sacrifice, worship', some have supposed that guilds were so called as being combinations for religious purposes, heathen or Christian

The sense 'member of a guild, guild brother', was expressed by OE *gylda* and *gegylda*, MLG *gilde* wk masc., the Teut word appears in OE as *gegild* (also *congild, congildal*), and in OF *gelde, geldon* (with many variants), one of a company (*gelde*) of foot soldiers]

1. A confraternity, brotherhood, or association formed for the mutual aid and protection of its members, or for the prosecution of some common purpose.

a. *Primarily* applied to associations of mediæval origin

The guilds mentioned in OE pre Conquest documents fulfilled much the same functions as modern burial and benefit societies, but their objects included the procuring of masses for the souls of deceased members, and the payment of *wergild* in cases of justifiable homicide They had always originally a strong religious element in their constitution Their meetings were apparently annual (cf ON *gilds* banquet, GUILD ALE, and quot *a* 1109 below) In later times the guilds of this 'social religious' type under went development in various directions, some becoming purely religious confraternities, while others acquired secular rights and privileges, eventually developing into municipal corporations

The *guild of merchants, merchant guild* (or *guild mer chant*, late OF *etapmanna gild*), an incorporated society of the merchants of a town or city, having exclusive rights of trading within the town, is an institution which in England has not been found before the Conquest, on the Continent the name and thing were older. In many English towns, and in the royal burghs of Scotland, the merchant guild became the governing body of the town, in Scotland the name of 'guild' is still preserved (cf. *Dean of Guild* s.v. DEAN)

The *trade guilds*, which in England come into prominence in the 14th c, were associations of persons exercising the same craft, formed for the purpose of regulating and promoting their common interests In some towns the representatives of these bodies superseded the older organizations as the municipal authority The trade guilds are historically represented in London by the Livery Companies, but these are not ordinarily known as guilds, and retain little of their original functions. The trade guilds of mediæval Europe closely resemble the ancient Roman *colleges*, with which they may perh have been historically connected.

II. The coin so called, or its value

3 An English gold coin, not coined since 1813, first struck in 1663 with the nominal value of 20*s.*, but from 1717 until its stoppage and circulating as legal tender at the rate of 21*s. Double guinea* a coin equal in value to two guineas *Spade guinea* a guinea of the pattern coined 1787–1800, so called from the form of the escutcheon on the reverse.

In 1663 the Royal Mint was authorized to coin gold pieces of the value of 20*s.* "in the name and for the use of the Company of Royal Adventurers of England trading with Africa", these pieces were to bear for distinction the figure of a little elephant, and 5*d.* of them were to contain 1 ounce of "our Crowne gold". The 20*s.* pieces of the African company received the popular name of *guineas* almost as soon as they were issued, as being intended for use in the Guinea trade, and made of gold from Guinea, and the name was extended to later coins of the same intrinsic value As silver was the sole standard till 1816, the value of the guinea was from the first subject to market fluctuations, according to the condition of the silver coin, which became so bad that the guinea rose as high as 30*s.* in 1695 In Dec 1717 it was fixed at 21*s.*, after which it underwent no further alteration The latest coinage of guineas took place in 1813 the *sovereign*, of the value of 20*s.*, was first issued in 1817

The ulterior etymology is disputed · the word coincides in form with the pl of the Fr and med Lat word for 'throat'. If the heraldic term is the original, the allusion may be to the colour of the open mouth of a heraldic beast It seems more likely, however, that the heraldic use is transferred from the sense 'red ermine', in which case the word may represent some oriental form, but the suggestion of derivation from Pers *gul*, rose (Hatz Darm.), is very improbable]

Gun (gən), *sb.* Forms : 4–6 **gonne, gounne, gune,** 5 **gowne, gune,** 6 **gon(e, gonn, goon(ne,** *Sc.* **gown,** 5– **gun.** [ME *gunne, gonne* (riming with *sonne* = sun) ; hence already in 14–15th c. the word was adopted as Welsh *gwn*, Irish (also Sc. Gaelic) *gunna*, Anglo-L. *gonna, gunna.*
With regard to the ultimate etymology, a suggestion has been made by Prof Skeat that ME *gunne* may represent a hypocoristic form of a Scandinavian female name compounded with *Gunn-*. This conjecture receives a strong confirmation from the fact (communicated to us by Mr. W. H. Stevenson) that an account of munitions at Windsor Castle in 1330–2 (Exchequer Accts. Q R Bundle 18, no. 14, Pub. Rec. Office) mentions 'una magna balista de corn quam vocatur Domina Gunilda' There are other instances of the practice of bestowing female personal names on engines of war, but there was no distinguished lady named Gunilda (= ON. *Gunnhildr*, spelt *Gunnild* in Havelok) in the 14th c, and it seems highly probable that this use of the name may have come down from Scandinavian times, when its exceedingly appropriate etymology would be understood (both *gunn-r* and *hildr* mean 'war') If *Gunnhildr*, as is likely, was a name frequently given to *ballistæ* and the like, it would naturally, on the introduction of gunpowder, be given also to cannon Indeed, there is some appearance of evidence that an explosive engine was actually called by this name many years before the earliest recorded instance of the use of gunpowder in warfare The 'song against the retinues of the great people' in *Pol. Songs* (Camden) 237, which must have been written in the reign of Edw II, contains the following passage :—'The gedelynges were gedered *Of gonnylde gnoste*: Palefreours ant pages, Ant boyes with boste, Alle weren yvlaht Of an horne boste The correct translation of this passage, which has hitherto been unexplained, seems to be as follows :—'The lackeys were gathered out of Gunnild's spark [OE *gnâst* see Grant Ask], the palfreys and pages, the varlets with their boasting, all were hatched of a horse's dung' According to analogy, the regular 'pet name' in ON for *Gunnhildr* would be 'Gunn' or 'Gunna', we would give *Gunna* in Mdx. Skett *Sv. dial-lex*, mentions *Gunne* as a female Christian name still surviving in Swedish country districts (In Iceland *Gunna* is a nickname, but it is taken to stand for *Gudrún*.) The other suggestions that have been made as to the origin of the word are obviously unsatisfactory. The assumed OF. **mangonne*, of which *gonne* has been supposed to be a shortening, is wrongly derived from *mangonneau* Mangonni, and is not philologically possible, unless as a back formation. The F *gonne*, large cask, does not occur before the 16th c, and is regarded by Littré as derived from the Eng *gun* The conjecture that ME *gunne* is of echoic origin perh involves no impossibility, but it has no positive support, and little intrinsic probability]

Gush (gʊʃ), v. Forms: 4- **goushe, guesche**, 6 **gus(s)he, gushe, gousshe, gowshe**, 6- **gush** [ME. *gosshe, gusche*, as the word is wanting in OE and the other Teut langs, there is nothing to forbid the supposition that it originated onomatopoeically in ME. If it be of pre-English origin, it must app be a derivative with suffix *k* or *sh* from the wk. grade of one of the Teut. roots **geut-* or **geus-* (see below), in which case its echoic expressiveness would be an accidental development.

The current but phonologically untenable view is that the word is an adoption of some one of the Scandinavian or LG words representing the Teut. root **geus-* (**gus-, gut-*), several of which closely resemble it in sound and sense; cf., for instance, ON. *gjóta* str vb., to spurt, gush, mod Icel. *gusa* n gush, *guza* wk vb., to gush, MDu. *goysen* (Du dial. *geuzen, guitten, gutten*), Du. *gutten, gudden* to gush The root **geus-* (which does not occur in OE.) is usually regarded as derived from pre-Teut **gheud-* (Teut. **geut-*, OE. *géotan* to pour; see Feist, also Gerl, Gurt) + suffix *t*, according to the phonetic law by which a dental + *t* became in OTeut *ss*, simplified after a long vowel or diphthong to *s*; the wk. form *gus-* with single *s* being developed analogically.]

1 *intr.* 'To flow or rush out with violence' (J.); to issue suddenly or in copious streams, as water or other fluid when released from confinement, blood from a wound, etc. Freq. with *down, in, forth, out, up*.

b. Of sounds or utterance: Produced in the throat

By non phoneticians any mode of pronunciation which is harsh or grating in effect is often supposed to be 'guttural', with this notion the designation is popularly applied by Englishmen to the German *ch*, but not to *k* or *g*, though technically it belongs equally to them As a technical term of phonetics, the word was first used to denote the Hebrew spirant ח (the thascoloumic), ר, ע: it is now commonly applied (inaccurately, if its etymological sense be regarded) to the sounds formed by the back of the tongue and the palate, as (*k, g, x, ɣ, ŋ*).

1594 J *La Primaud Fr Acad* II 87 The Hebrewes name their letters, some gutturall, because they are pronounced more in the throat others, dentall, because a man cannot pronounce them without the teeth *c* 1600 *A* HUME *Brit Tongue* I vii, A labial letter can not symboliz a guttural syllab 1642 HOWELL *For T'zar* (Arb) 52 A gutturall pronunciation is an inflexible badge of an ancient language. 1668 WILKINS *Real Char.* III xi 364 The Vowel (y) is wholly Guttural, being an emission of the breath from the throat, without any particular motion of the tongue or lips 1712 HICKERINGILL *Calf* (Bodm. Gy, Sc var Guy *v.*1 *Obs*

Gy-, in words of Greek etymology, is in this Dictionary marked to be pronounced with (dʒ), in accordance with the general principle that in words of Gr derivation (but latinized spelling) Eng. pronunciation follows the rule of the Romanic langs for the 'softening' of *c* and *g*. The pronunciation (dʒ) is now practically universal in the case of those few words beginning with *gy-* that have much colloquial currency (*gymnasium, gymnasi, gymnastic*), but with regard to the many less common words, chiefly scientific terms of recent origin, beginning with *gymn-, gym-, gyro-*, there are many, especially among professional Greek scholars, who prefer the 'hard *g*' The (g) is very commonly heard in *misogynist*, somewhat frequently in *gypsum*, esp from mineralogists educated in Germany, and occasionally in *gyrate, gyration*.

The orthoepists of the 18th c. (Sheridan, Nares, Walker) advocate the 'soft' pronunciation in *gymnastic*, but admit that prevailing usage may be against them All the pronouncing Dicts of the 19th c have (dʒ) throughout, exc Enfield, Jameson, and Cassell's Encyclopædic Dict, the last named restricts the 'hard *g*' to those terms of science and of classical antiquities 'which have not passed, and probably will not pass, into general use'

Gytrash (gəˈtræʃ). *north. dial.* Also **guy-**. An apparition, spectre, ghost, generally taking the form of an animal.

1847 C BRONTË *Jane Eyre* xii, I remembered certain of Bessie's tales, wherein figured a North-of-England spirit, called a 'Gytrash'; which, in the form of horse, mule, or large dog, haunted solitary ways, and sometimes came upon belated travellers. 1852 ATKINSON *Last Giant Killers* 150 Then another name was called and spelt 'Gytrash'

Gyve (dʒaɪv), *sb.* Chiefly *pl.* Now *arch.* or *poet.* Forms: *pl.* 3, 6, 7 gives, (5 gyvys). 5–6 guyv(i)es, (7 gieves), 7–8 guives, 4- gyves. *sing.* 6 give, 7 guive, 7- gyve. [ME. *give*, of obscure origin.

The alliteration in ME poetry shows that the word was originally pronounced with initial (g), and from the spelling *guive* it would appear that this pronunciation continued until the 18th c; indeed, it is indicated in the pronouncing Dicts. of Sheridan (1780) and Scott (1797). The now prevailing pronunciation with (dʒ) is due to misinterpretation of the graphic form of a word that had become obsolete in oral use. The form points to an OF **gwive* (spelt *give* in *French Chron. Lond.*, 14th c.). Prof Skeat suggests that this may represent an adoption of some derivative of the Teut. root **wīþ*- (OHG *wīdan* to wind round, AS. *wīþ*, a straw-band). But the absence of any record of the word in continental OF. constitutes a serious objection to this conjecture. Can *OF. guive* be an adoption of the synonymous ME and OE *wīdde*, the initial *w* being represented by *gw-*, and the unfamiliar Eng. dental spirant represented by *v*? If this suggestion be correct, Layamon used both the Eng. and the Fr. form of the word; cf. with quot. *c* 1205 below the following (line 20833): 'Nimeð me þene like mon, and doð wiðe an his sweore.']
